

The Thermo Scientific SX30 combines patented dual frequency Doppler (DFD) technology with digital signal processing to create an industry leading measurement device for fluids that contain particulate. It is immune to higher levels of external noise than other single frequency Doppler devices, enabling the SX30 to operate in a broader range of applications.

Thermo Scientific SX30

Portable Dual Frequency Doppler Flowmeter

Thermo Scientific SX30 transducers feature stainless steel shrouds suitable for most pipe materials.

Applications

- Slurries
- Primary Sludge
- Dredging
- Activated Sludge

Accurate & Reliable

Dual Frequency Doppler (DFD) technology enables the Thermo Scientific SX30 to operate in what were previously considered marginal applications for Doppler flowmeters. Unlike conventional Doppler flowmeters, which operate at a single frequency, the SX30 generates two independent ultrasonic signals at different frequencies. By correlating these frequencies, the instrument identifies and eliminates noise errors from sources such as variable frequency drives.

Application Specific

The operation of the SX30 is enhanced by an Expert System which allows the flowmeter to automatically “learn” the application parameters. As a result, the SX30 can be setup in four easy steps and at a fraction of the time necessary to configure competitive flowmeters.

Durable & Easy-to-Use

The design features a sealed membrane keypad making the unit fully weatherproof. Large keys make it easy to enter data and navigate the on-screen menu—even with gloved hands.

Features & Benefits

- Accuracy to $\pm 1\%$
- Simple and easy-to-use
- Excellent noise immunity
- NEMA 6 environmental sealing
- Up to 24 hour battery operation
- Powerful 90,000 point data logger
- Serial interface port for data retrieval via HydraScan software
- Universal AC adapter charging socket

Thermo Scientific SX30

Performance Specifications

Velocity Range	0.06 m/s to 5.5 m/s (0.2 ft/s to 18 ft/s); volumetric value based on cross-sectional area of pipe
Accuracy	±1% of velocity full scale
Fluids	Liquids containing particulate entrained gas bubbles
Pipe Size	12 mm to 5000 mm (0.5 in to 200 in)

Physical Specifications

Transmitter	NEMA 6 (IP67), waterproof against accidental immersion and splashproof with lid open
Transducers	Encapsulated dual frequency sensor heads, encased in stainless steel shrouds with integral transducer clamps and BNC connectors 5 m (16 ft) cable - standard; 15 m (50 ft) cable - optional
Weight	Approximately 6.8 kg (15 lbs)

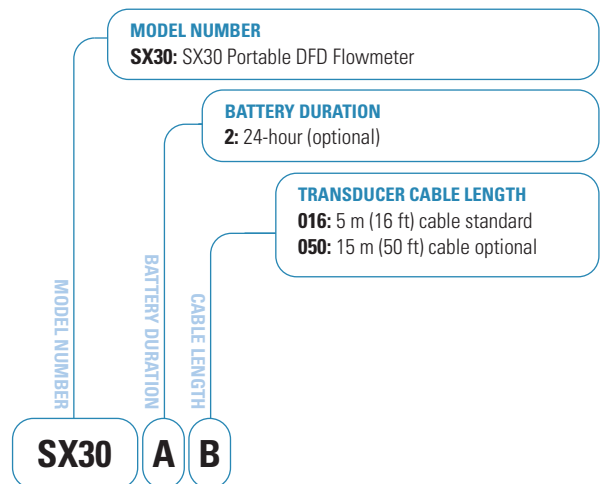

Functional Specifications

Outputs	4-20 mA (into 750 ohms); 12-bit, 5 kV, opto-isolated, loop or self-powered; RS232 serial interface
Power Supply	Built-in lead acid gel battery 24-hour, continuous operation 90-264 VAC, 50/60 Hz 12-15 VDC auxiliary power port
Charge Period	8 hours
Keypad	21 key with tactile action
Display	Backlit, 240 x 60 dot, high resolution graphics display
Data Logger	90,000 point data logger Programmable in log intervals of 30 seconds or 1, 5, 15, 30 or 60 minutes HydraScan retrieval software for Windows® included as standard Compatible with Microsoft® Excel®, Lotus® 1-2-3 and other similar packages
Temperature Range	Transducers: pipe surface -40°C to +121°C (-40°F to +250°F); ambient air limited to +80°C (+176°F) Electronics: +5°C to +40°C (+41°F to +104°F), CSA approved; -20°C to +60°C (-4°F to +140°F), non-CSA approved
Compliance	Designed to meet CE and NRTL/C (CSA) for non-hazardous areas
